

## **Gary Harrison**

Gary Harrison is Pipeline Technical Authority with BP's Deepwater GOM business unit's Projects & Engineering Team. In this capacity, Gary is responsible for technical support and oversight for the design and integrity management of subsea flowlines for subsea tieback projects to BP's deepwater Gulf of Mexico assets. Gary is a Technical Advisor to BP internal clients and participates in BP's technology development programs. He has over 35 years experience in offshore pipeline design and construction. He is a PE in the state of Texas and an active ASME member. Gary is currently serving ASME as a member of the Petroleum Division Executive Committee and International Offshore Pipeline Forum steering committee. He holds BS degrees in Aerospace and Civil Engineering from Georgia Institute of Technology.
