

Pete Simpson, Technical Manager of 2H Offshore, Rio de Janeiro, Brazil

Pete has over ten years experience in the oil and gas industry. He holds a first class honours degree in Mechanical Engineering from Cardiff University, and after graduating in 1998, Pete worked for BG Technology developing industrial gas combustion systems, before starting work with 2H Offshore engineering's head office in Woking, England. During his time with the company, he has worked with all types of riser systems, from drilling, to completion, to production risers, and has also been involved in the development of new technologies and research initiatives.

During his time at 2H, Pete has spent two years working on the Kizomba B freestanding riser design, in conjunction with Saipem in Paris, and has been the Technical Manager of 2H's Brazil office in Rio de Janeiro since 2005.
